

Signs of Prosperity

By Madeline C. Gerwick

Aries: You make your money by being first and leading the way with your innovative ideas. You might find that you're particularly interested in new forms of energy, the military, or ways to protect and support those you love. Take the time to document your new ideas and follow through with them, so you get the financial rewards you deserve. If you give up on your ideas too quickly, someone else will get the money. Developing some staying power, or hiring someone who has it, will ensure you get your ideas to market successfully.

Taurus: You're a natural money magnet! Money comes to you easily and you're likely to create a prosperous life for yourself by investing other people's money. Being a financial analyst, a financial manager for a company, or working in banking or investment firms are natural ways for you to make money. You understand the Golden Rule (those with the gold, make the rules) and how to get more of it. Whether you invest for others or just yourself, you're naturally strong at accumulating money. Remember to keep it flowing by spending or investing it *in joy*, so it continues to keep you and others prosperous. It will return to you if you do.

Gemini: You're a natural communicator, speaker, author, journalist or story-teller, and you easily make money while engaged in these types of activities. You might even sing your stories! While it's always true that your energy is the same as your money, in your case, your *words* are the same as your money. Use them well to create a life of prosperity for yourself by ensuring you have the right audience and make them valuable enough so others want to pay for them. That means you can't just fling them far and wide without remuneration. Get paid for your ideas and words and be careful which ones you choose. Some words bring in more money!

Cancer: You're the Great Mother, the natural nurturer of the world. You easily create a prosperous life by taking care of others. Motherhood doesn't pay well, you say? Apply it to more than your children or your own home. Assisted living centers make good money taking care of elders. Chefs, restaurants, and providers of healthy food and snacks feed the world. Babies and children need someone to care for them when Mom and Dad are working. You might even write books with tips to care for others. Most important though is to *care for yourself first*. Then you can make plenty of money taking care of others!

Leo: You become prosperous by shining your light and shining your light on others. Your natural warmth and sunny disposition easily attract money and opportunities to you. You can make a

great coach, a manager who knows how to motivate employees, or a celebrity or speaker who likes a big audience. You're terrific working with children and have wonderful talents that encourage them. You want your life to be creative and to express yourself freely. When you do this by approving of yourself first and foremost (instead of waiting for others to approve of you), you can make millions. Follow your energy to be your most creative self!

Virgo: Your service to the world is what brings you prosperity. The bigger the "world" that you serve, the bigger your prosperity is. You're the Great Worker, constantly striving to improve and be more productive. You know how to handle the details for maximum efficiency, plus your analytical and system skills are excellent. You instantly identify patterns which are out of place or incorrect. Be sure you get paid *well* for your abilities, which are superior to many others, who get paid more for doing less. You're also the Temple Keeper, working to align the world with sacred cycles and wisdom. That was the original path for Virgos, but is less utilized in our current culture. Choose to be on the Universe's payroll, so you'll be rewarded for your service!

Libra: Your ability to bring balance and harmony to any situation can make you a lot of money. This skill is well utilized in international situations by corporations and government, in legal situations, and relationship counseling. You can also make money by partnering up! It doesn't matter if this person is a life partner or a business partner. You make money when you're in a relationship that works well and you both feel unconditionally supported. This occurs because a partner helps you balance yourself and provides another point of view for you to consider. As you expand this by creating balance and harmony for others, you become more prosperous!

Scorpio: You're the Master Detective and you get to the bottom of any mystery. With this skill, you're literally the Master Wizard or Master Healer as well. You make money by discovering the real reason for situations and then fixing them. Your ability to transform any situation is valuable and you should be paid well for your work. You're the equivalent of a modern-day Alchemist, discovering how to make gold from your own energy. Although you're fearless, and will go into any dark corner, remember that you always create more of whatever you focus on. This is always true for everyone, but Scorpio needs to remember to also *look for the light*.

Sagittarius: You make money by exploring the world and shooting for the Moon! You might do this from your computer or you may physically traipse to other places. Sales, travel, education, and publishing are natural venues for you. An intrinsic explorer, your resources are extensive and you know just the right person to help with any situation. Your philosophical leanings guide your journeys, whether mental or physical, and provide a desire to teach or train at some level. Your high energy and optimism attract plenty of money and opportunities. Be sure you value your energy and your ability to create fun. They're your ticket to prosperity!

Capricorn: You're either an Elder or an Elder-In-Training. You make money strategically. Your patience, organization, and your ability to plan for the future puts you in positions where you make decisions which impact a lot of other people. This can be in any type of organization, business, government, or non-profits. Your main concern is to make decisions that can stand the test of time, not just the next quarter. Often you must make choices which require you to

put aside your personal feelings for the good of all. For this reason you're a sought-after manager or business person, and you can make a lot of money with these abilities.

Aquarius: Your primary job here on Earth is to create higher consciousness. Earth is pretty dense though, so you may have forgotten your mission! If not, you've probably already checked the want ads and found no requests for that position. Since your ideas are about 50 years ahead of their time (or more!), you must be creative to anchor in your advanced ideas. You may excel at science or engineering, as a member of a think tank, teach new concepts, or invent new processes or products. If you can master communicating with humans who struggle to understand your innovative ideas, you'll get rich! Earthlings need your assistance in all areas.

Pisces: You make money by inspiring others and bringing the world together. It's natural for you to merge with other people, plants, animals and stories, to experience their reality. This provides you a unique perspective, which is valuable in movies, television, pictures, and other ways to communicate your more holistic view of the world. Your spiritual wisdom is the key to your prosperity. Sharing it in whatever way appeals to you is important to your success. Pisces has enough faith and trust in the Universe to create anything, including plenty of abundance for yourself. Be sure to use it!
